Lesotho Population-based HIV Impact Assessment 2020

LePHIA 2020

This project is supported by the US President's Emergency Plan for AIDS Relief (PEPFAR) through CDC under the terms of cooperative agreement #U2GGH002173. The findings and conclusions are those of the authors and do not necessarily represent the official position of the funding agencies.

The mark "CDC" is owned by the US Dept. of Health and Human Services and is used with permission. Use of this logo is not an endorsement by HHS or CDC of any particular product, service or enterprise.

8.1 Questionnaires

This document lists the questions asked in the household roster, household interview, and adult interview for LePHIA 2020. Questions are provided in order of appearance. Operational and process data used to administer the questionnaire have been omitted: including routing for the interviewer to begin the interview, timestamps, questions to determine eligibility and consent, and questions filled in by the interviewer during biomarker testing and linkage to care.

Information on each question is provided in the following columns:

- *NO.* contains the number of the question in the tablet.
- *VARIABLE* contains the variable name corresponding to the question. If the variable corresponding to the question is not included in the dataset, this column indicates whether the variable was excluded because it is a process variable used to administer the questionnaire or whether it was redacted to protect the privacy of participants.
- *QUESTION* contains the full question text. Interviewer instructions are provided in all capital letters. Fill-in fields, such as line number, are provided in brackets, e.g. [linenum].
- *CODING LABELS* contains the label for each response option, while *CODING VALUES* contains the corresponding values or type of field if not categorical (text, datetime, integer, etc).
- The *SKIP PATTERNS* and *SKIP TO* columns contain information on the routing of the instrument. Individuals identified by the logic in the *SKIP PATTERNS* column will skip to the screen indicated by the *SKIP TO* column. When the *SKIP PATTERN* column is blank, the interview proceeded with the next question.

			NO	2		
			DON'T KNOW	-8		
806.5	Process variable removed from dataset	Now I am going to ask you about tests a health care provider can do to check for cervical cancer. The cervix connects the uterus to the vagina. The tests a health care provider can do to check for cervical cancer are called a Pap smear, HPV test and VIA test. For a Pap smear and HPV test, a health care provider puts a small stick inside the vagina to wipe the cervix and sends the sample to the laboratory. For a VIA test, a healthcare worker puts vinegar on the cervix and looks to see if the cervix changes color.	REFUSED	-9		
			CONTINUE	A	SKIP IF confgend = 1
