Mozambique Population-based HIV Impact Assessment 2021
INSIDA 2021

8.1   Questionnaires

This document lists the questions asked in the household roster, household interview, and adult interview for INSIDA 2021. Questions are provided in order of appearance. Operational and process data used to administer the questionnaire have been omitted: including routing for the interviewer to begin the interview, timestamps, questions to determine eligibility and consent, and questions filled in by the interviewer during biomarker testing and linkage to care.

Information on each question is provided in the following columns:

· *NO.* contains the number of the question in the tablet.

· VARIABLE contains the variable name corresponding to the question. If the variable corresponding to the question is not included in the dataset, this column indicates whether the variable was excluded because it is a process variable used to administer the questionnaire or whether it was Redacted to protect the privacy of participants.

· *QUESTION LABEL* contains the text that appears as a label at the top of the screen for the question

· *QUESTION TEXT* contains the full question text. Interviewer instructions are provided in all capital letters. Fill-in fields, such as line number, are provided in brackets, e.g. [linenum].

· *CODING LABELS* contains the label for each response option, while *CODING VALUES* contains the corresponding values or type of field if not categorical (text, datetime, integer, etc).

· The *SKIP PATTERNS* and *SKIP TO* columns contain information on the routing of the instrument. Individuals identified by the logic in the *SKIP PATTERNS* column will skip to the screen indicated by the *SKIP TO* column. When the *SKIP PATTERN* column is blank, the interview proceeded with the next question.
